### Baltimore County Dundalk/Sollers Point High School Complex

ESP recently completed the design for two new separate replacement high schools on the same site with shared core facilities. Dundalk is a comprehensive neighborhood high school while Sollers Point is a magnet technical high school. The combined facility will support approximately 2,200 students in 340,000 SF. ESP is involved with technology planning for classrooms, labs, and technical curriculum spaces as well as design of AV presentation, video distribution, voice and data networking, and video surveillance, alarm detection and access control security systems.

### Ballou High School, District of Columbia Public Schools

ESP recently completed technology planning and design for the 290,000 SF \$90M new Ballou High School. . The four story, school within a school features six academies and will be built on the site of the football stadium. Educational Systems Planning will provide design services for classroom AV, IT, and security systems.

### Severna Park High School, Anne Arundel County Public Schools

Educational Systems Planning (ESP) is currently provided technology planning and communications infrastructure design for the new Severna Park High School. The \$103 million 342,500 square-foot facility is a comprehensive high school with a full curriculum of honors program offerings. Educational Systems Planning is providing technology planning and voice, video, AV, data, and security communications infrastructure design for this specialized school.
