### Southeast Tennis and Learning Center

The 56,000 SF renovation and addition to the Tennis and Learning Center consists of classrooms, computer lab and multi-purpose room with significant AV presentation and sound enhancement systems. Also included is a renovated fitness center, senior lounge, and offices. The indoor enclosure houses six new tennis courts with video recording and sound systems. The new outdoor pavilion and surrounding tennis courts on both sides of Oxon Run has wireless capabilities.

### Marvin Gaye Center

ESP recently provided technology planning and design for the 8,130 SF new Marvin Gaye Recreation Center in the District of Columbia. The building provides flexible multi-purpose, community, teen, senior, computer rooms as well as kitchen and office facilities. The communications infrastructure provides for wired and wireless voice, video and data distribution systems. In addition, ESP provided design for classroom AV systems and alarm detection, access control and video
